

Manage your fleet

with Vodafone's IoT Solutions

Your digitised fleet

Our system makes it simple to set and enforce company policies. With features like speed limit alerts, geofencing, and ignition control, you can ensure compliance effortlessly. Our GPS Tracking device provides real-time tracking for efficient fleet management, reducing fuel costs, improving visibility, ETA accuracy, route replay, and driver safety.

Asset Management

- Set rules and alerts to adhere to company policy requirements, and get alerts for driver behaviour.

Safety & security for drivers

- Reduce speeding and improve fuel economy.
- live asset location tracking with geofencing

Enhanced Customer Service

- Provide accurate ETA's to customers and dispatch drivers with real-time vehicle tracking.

Operational efficiency & cost reduction

- Optimise routes, deliveries and sales trips, make fuel savings
- adapt driving behaviours as necessary to reduce costs and streamline operations
